OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
Pink Salmon	9+20 Sept 94	1032 + 46			

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Basin Creek has its mouth in the Adak small boat basin,  
and it has a barrier to migration behind the dump. Pink  
Salmon were counted by foot on 9+20 September, with  
1032 Adults found on the 9th. No Salmon were found  
above a series of two foot falls about 2000' feet  
up from mouth. First 300' of stream are in a culvert.
